EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below.

1. In claim 3, line 2, the phrase "*used amount of the solvent*" has been corrected to – the amount of the solvent used --.
2. In claim 4, line 2, the phrase "*used amount of the solvent*" has been corrected to – the amount of the solvent used --.

The above examiner's amendment is merely editorial in nature and does not affect the metes and bounds of the claims.

Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The following is an examiner's statement of reasons for allowance: the improved synthesis of aryl 1,1-dimethylpropargyl ethers by Godfrey et al (Tetrahedron Letters, Vol. 35, No 35, 1994, PP. 6405-6408) is considered to be the closest prior art. However, the synthetic strategy is fundamentally different from the prior art. That is, the reactive centers a halogen and a hydroxyl appear on different reactants. There is no motivation to "switch" the reactive centers of prior art reactants in order to arrive at the instant reactants.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
